PROFILE SUMMARY

Software professional with 2.5 Years of experience in Information Technology (IT) industry as an Automation Test Engineer

- Excellent knowledge and work experience in Selenium and Manual Testing.
- Strong experience in Automating Web Application Testing using Selenium WebDriver with TestNG framework.
- Strong experience in Functional and Regression testing using Manual and Automated testing tools - selenium WebDriver.
- Proficient in Core Java and Object-Oriented programming Concepts (OOPS)
- Certified in RPA Developer Advanced issued by UiPath Academy.
- Worked on UiPath Robotic Enterprise Framework to create the script for the Enterprise applications and familiar with Orchestrator to manage robots and testing activities.
- Good knowledge in API test creation and execution by using Postman tool.
- Well acquainted with SDLC, Testing Life Cycle and Defect Life Cycle.
- Experience in writing Test Plans, Test Cases, Test Procedures and Test Scripts from requirements and Use-Cases
- Experienced in Planning, Creating & Executing Test Script based on the functional requirement.
- Able to communicate effectively with both technical and non-technical project stakeholders.
- Excellent problem-solving skills with a strong technical background and good interpersonal skills.
- Quick learner and excellent team player having ability to meet tight deadlines and work under pressure.

SKILLS

Languages	: Java, VB Scripting
Frameworks/Tools	: Selenium, UiPath, Extent Reports, JIRA, TestNG, ALM, Postman
Operating System	: UNIX, Windows
Database	: MySQL

EDUCATION

- 2017   B.E. from KSR College of Technology with an aggregate of 70%
- 2013   Higher Secondary from SHNV higher secondary school with an aggregate of 92.5%.
- 2011   SSLC from SHNV higher secondary school with an aggregate of 95.6%.

PROJECT SUMMARY

Project #1

Name	: Application Adoption Factory
Client	: Union Bank of Switzerland
Domain	: Financial & Banking
Role	: Automation Test Engineer
Project Timelines	: December 2017 – Present
Technology	: Selenium and Manual Testing

Project Description:

Application Adoption Factory is a very ambitious project of Union Bank of Switzerland for migrating their application to the latest technology without affecting the existing functionality. As part of the AAF Migration, Initially, our team is involved in Due Diligence and according to the client requirements; we create a script for all the functional requirements and separated the workflows based on the test scenarios.

For some applications, we create the separate workflow and other applications, we create the test script using the Selenium Web driver for the entire functionality-testing requirement and will execute from the TestNG in the Old server to capture the response of the application.

After deployed the same application in the new server, we execute the same test script in the new (target) server to analyse the application is working as the old server or not.

Responsibilities:

- Interact with the client to understand their requirements, test data, constraints and then, collaborated with team members to meet
- Responsible for the creation of test scripts which covers all the functionality will execute in the old server as the baseline testing.
- Responsible for documentation of the existing defects and response of the application's functionality in the old server
- Responsible for Regression Testing execution in the new server and will raise the defects to the Dev team.
- Raising defects and following up with the defect resolution in HP ALM.
- Interact with the client in the Sign-Off call along with our Dev team to support team in QA activities in the production server.
